## TERGAJET®

### Low-Foaming Phosphate-Free Powder

- Concentrated to save you money
- Phosphate-free, biodegradable and readily disposable
- For FDA cleaning validations and food contact surface cleaning
- Low-foaming heavy duty detergent for high performance results
- Free rinsing to provide reliable results and no interfering residues
- Ideal for under-counter and floor-standing lab washing machines

**Used to clean:** Water testing labware, phosphate-sensitive lab equipment, hospital instruments, optical components, pharmaceutical and cosmetics manufacturing equipment, tissue culture ware, plate glass, metal castings, forgings and stampings, industrial parts, animal cages, electronic components, tanks and reactors.

**Used to remove:** Soils, radioisotopes, radioactivity, organics, grit, grime, slime, grease, tars, resins, fats, oils, blood, tissue, particulates, inorganic residues, chemicals and solvents.

**Surfaces cleaned:** Recommended for glass, stainless steel, PTFE, ceramic, cement and alkali resistant plastics and metals. TERGAJET is inhibited for aluminum. Corrosion testing is advisable.

**Cleaning method:** Labware washers, dishwashers, washer-sterilizers, washer-sanitizers, cart washers, spray cabinet washers, electrocleaning, ultrasonic cleaners, clean-in-place and manual cleaning.

**Directions:** Follow machine manufacturers directions and use the powder detergent receptacles. In general, use 1– 2% solution in hot water wash cycle (3 – 5 Tbsp/gal, 1 1/4 – 2 1/2 oz/gal or 10 – 20 ml/L). Most machines need 2 1/2 oz added at a typical 2 gal wash cycle. For manual, soak, circulate or ultrasonic use, make a 1% solution in warm or hot water. For abrasive scrubbing, make a paste.

For difficult soils, raise water temperature and use more detergent. Wear protective gloves and eyewear when handling. RINSE THOROUGHLY—

preferably with running water. For critical cleaning, do final or all rinsing in distilled, deionized or purified water. Used on a wide range of glass, ceramic, plastic and metal surfaces. Corrosion testing is advisable. Material compatibility guidelines available on request.
